FINDING OF NO SIGNIFICANT IMPACT

Environmental Assessment

SAND ISLAND GROUP CAMPSITE

DOI-BLM-UT-Y020-2015-0028

Based on the analysis of potential environmental impacts contained in the (above referenced) environmental assessment, and considering the significance criteria in 40 CFR 1508.27, I have determined that construction of the Group Site at Sand Island Campground will not have a significant effect on the human environment. Only one resource, Recreation, was identified as being impacted by the proposal, and these impacts are of a positive nature. The proposal would improve the camper experience at the Sand Island Campground. An environmental impact statement is therefore not required.
